

Spot Wins Premier's Award for LiveSmart BC Application

Premier's Awards in Innovation and Excellence presented to honour public service

For Immediate Release

Vancouver, BC and Victoria, BC— February 5, 2009 — Spot Solutions Ltd. (www.spotsolutions.com), a prominent custom software development and support firm, announced today its Premier's Award in Innovation and Excellence in BC public service programs.

Talk of reducing our 'carbon footprint' is everywhere. But with LiveSmart BC, British Columbia has put that talk into action. An incentive program that gives British Columbians practical solutions to making their buildings more energy efficient, LiveSmart BC helps citizens save money and reduce their greenhouse gas emissions. Simply put, the program entitles homeowners to provincial, utility and federal rebates when they make energy efficient upgrades such as installing insulation or replacing old furnaces, water heaters, doors and windows.

Developing a new program that links to other government and utility programs, while maintaining policies within the Ministry of Energy, Mines and Petroleum Resources and ministries such as Housing, Finance, and Small Business and Revenue, was not easy. Spot Solutions, working in conjunction with the ministries mentioned above, developed the web-based software application that automates the refund process for program participants.
